CONTENTS OF VOLUME XXIII.

NUMBER LXVII.

Page.

Art. I. Approximate Cotidal lines of Diurnal and Semi-diurnal Tides of the Coast of the United States on the Gulf of Mexico, with two plates; by A. D. Bache, - - - 1

II. Notes on the Progress made in the Coast Survey, in Prediction Tables for the Tides of the United States Coast; by A. D. Bache, - - - - - - - - - - 12

III. Observations to determine the cause of the increase of Sandy Hook, made by the Coast Survey for the Commissioners on Harbor encroachments of New York; by A. D. Bache, - 16

IV. Notice of Observations to determine the Progress of the tidal wave of the Hudson River, made by the Coast Survey for the Commissioners on Harbor Encroachments; by A. D. Bache, - - - - - - - - - - 17

V. On the Characteristic Action of the Barometer during the passage of a Revolving Storm, such as a Hurricane or Tornado, being a small rise and not a great fall; by John Chappellsmith, - - - - - - - - - 18

VI. On the Spirality of Motion in Whirlwinds and Tornadoes; by W. C. Redfield, - - - - - - - - 23

VII. On the Application of the Mechanical Theory of Heat to the Steam Engine; by R. Clausius, - - - - - 25

VIII. On the Agency of the Gulf Stream in the Formation of the Peninsula and Keys of Florida; by Joseph LeConte, M.D., 46

IX. On Screw-Propellors; by W. Rogers Hopkins, - - - 60

X. Statistics of the Flora of the Northern United States; by Asa Gray, - - - - - - - - - - - 62

XI. Observations on the Falls of Niagara, with reference to the changes which have taken place, and are now in progress; by R. Bakewell, - - - - - - - - - - 85

Page.

XII. Biography of Johann Nepomuk von Fuchs; by FRANZ VON KOBELL, - - - - - - - - - - - 95

XIII. On the Presence of Fluorine in the Blood; by JEROME NICKLÈS, - - - - - - - - - - - 101

XIV. Correspondence of JEROME NICKLÈS—Obituary of Gerhardt, 102.—Submarine Telegraph: Society of Acclimation: Caoutchouc: Wax and Tallow, 107.—Artesian Wells in Paris: Charts of the Ecliptic, 108.—Aërostats: On Perfumes, 109.—Manufacture of Aluminium, 111.—Origin of Urea in the Animal Economy, 112.—Electricity; theory of the voltaic pile, 113.—Galvano-caustic: Crystallogeny: Artificial milk, 114.—Universal Exhibition of Photography: Bibliography, 115.

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the wave length of the most refrangible rays and of those which act chemically upon iodid of silver: On Tantalum and its compounds with chlorine and bromine, 116.

Mineralogy and Geology.—Description of a new Meteoric Iron from Chili, containing Native Lead, and an account of a fall of a large mass of Meteoric Iron at Corrientes in South America, by R. P. GREG, 118.—Hard Guano from Monks Island, by A. SNOWDON PIGGOT, 120.—On Columbian Guano, its composition and character, by JAMES HIGGINS, M.D., and CHARLES BICKELL, Ph.D., 121.—Chemical Analysis and Comparison of Serpentine Marbles known under the name of Verd Antique, by CHARLES T. JACKSON, 123.

Botany and Zoology.—DeCandolle's Prodromus, 126.—Flora Vectensis; being a Systematic Description of the Phænogamous or Flowering Plants and Ferns indigenous to the Isle of Wight, by the late WILLIAM ARNOLD BROMFIELD, M.D.: Seeman's Botany of the Voyage of the Herald, 127.—Synopsis of the Cactaceæ of the United States and Adjacent Regions, by GEORGE ENGELMANN, 128.—The Musci and Hepaticæ of the United States, east of the Mississippi River, by WILLIAM S. SULLIVANT, 129.—On the probable Origin of the Organized Beings now living in the Azores, Madeira, and the Canaries, by OSWALD HEER, 130.—On the Ruminant Quadrupeds and the Aboriginal Cattle of Britain, by Professor OWEN, F.R.S., 132.

Miscellaneous Scientific Intelligence.—Notice of the Scientific Results of the Expedition to the North Pacific Ocean, under the command of Com John Rodgers, by W. STIMPSON, 136.—On the Meteor of July 8th, by Prof. N. K. DAVIS, 138.—Credit to whom credit is due, Note by Prof. A. D. BACHE: Geographical Discoveries in Africa, by Rev. Mr. LIVINGSTON, 139.—On Isothermal Lines, by Prof. HENNESSY, 144.—Machine for Polishing specula of Reflecting Telescopes, by Dr. R. GREENE, 145.—Observations with the Aneroid Metallique and Thermometer during a Tour through Palestine and along the Shores of the Dead Sea, by Mr. H. POOLE, 146.—Geological Progress of the World; note by J. D. DANA: Anatomical Models by H. D. Schmidt, Philadelphia, 147.—*Obituary.*—Death of Prof. Nicholas M. Hentz: Wm. Yarrell: Professor Bojer, 148.—A Treatise on Mineralogy, by CHARLES UPHAM SHEPARD: Elementary Course of Geology, Mineralogy, and

Physical Geography, by Prof. DAVID T. ANSTED, M.A., F.R.S., etc., 148.—Chemical and Pharmaceutical Manipulations, by CAMPBELL MORFIT: Miscellaneous Chemical Researches, by CHARLES F. CHANDLER: The Microscope and its Revelations, by WM. B. CARPENTER, M.D., etc: The Quarterly Journal of Pure and Applied Mathematics, edited by J. J. SYLVESTER, M.A., F.R.S, 149.—Patent Office Report for 1855: The Illustrated Annual Register of Rural Affairs and Cultivator Almanac for 1857: United States Japan Expedition, Vol. III, by GEORGE JONES, A.M.: First Report on the Noxious, Beneficial, and other Insects of the State of New York, by ASA FITCH, M.D.: Smithsonian Contributions to Knowledge, Vol. VIII. 150.—Journal of the Academy of Natural Sciences of Philadelphia, Vol. III, Part III, 151.

List of Works, 151.

NUMBER LXVIII.

Page.

ART. XV. Report upon the Results of Microscopic Examinations of the Soundings made by Lieut. Berryman, of the U. S. Navy, on his recent voyages to and from Ireland in the Arctic; by Prof. J. W. BAILEY, - - - - - - 153

XVI. Coal-Fields of the East Indian Archipelago, - - - 157

XVII. Observations on the Zodiacal Light; by Rev. GEORGE JONES, A.M., - - - - - - - - - 161

XVIII. On some Compounds of Ethylene; by H. S. BUFF, - 176

XIX. On the Rose-colored Mica of Goshen, Mass.; by J. W. MALLET, Ph.D., - - - - - - - - - 180

XX. Results of some Analyses made for the Geological Survey of the State of Alabama, by J. W. MALLET, Ph.D., - - 181

XXI. Note on "Red Sulphur;" by J. W. MALLET, Ph.D., - 185

XXII. Observations upon the Carboniferous Limestones of the Mississippi Valley; by JAMES HALL, - - - - - 187

XXIII. Remarks upon the Genus Archimedes or Fenestella from the Carboniferous Limestones of the Mississippi Valley; by JAMES HALL, - - - - - - - - - - 203

XXIV. On the Avoidance of the Violent Portions of Cyclones; with Notices of a Typhoon at the Bonin Islands; by JOHN RODGERS, Commander U. S. N., and ANTON SCHÖNBORN. Communicated by W. C. REDFIELD, - - - - - 205

XXV. On the Mode of Formation of Cannel Coal; by J. S. NEWBERRY, - - - - - - - - - - - 212

XXVI. Abstract of a Meteorological Journal kept at Marietta, Ohio, for the year 1856; by S. P. HILDRETH, - - - 215

Page.

XXVII. On some Soluble Basic Salts of Tin; by JOHN M. ORDWAY, - - - - - - - - - - - 220

XXVIII. A Problem in Practical Surveying: demonstrated by means of Transversals; by Prof. W. M. GILLESPIE, - - 224

XXIX. Biography of Johann Nepomuk von Fuchs; by FRANZ VON KOBELL, - - - - - - - - - - 225

XXX. Researches on the Ammonia-cobalt Bases; by WOLCOTT GIBBS and F. A. GENTH,—Part I, - - - - - - 234

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the alloys of Aluminum, 265.—On the preparation of Lithia: On Glycol, 266.—Action of iodid of phosphorus upon Glycerine: Action of the chlorids and bromids of phosphorus upon Glycerine, 267.—On the formation of urea by the oxydation of albuminous matters: On triphenylamin: On some products of the oxydation of alcohol: On the quantitative determination of boric acid, 268.—On organic compounds containing metals: Action of sulphuric acid upon the nitriles and amids, 269.

Mineralogy and Geology.—Note on the occurrence of Telluret of Silver in California, by WM. P. BLAKE, 270.—Notices of Remains of Extinct Vertebrated Animals discovered by Prof. E. Emmons, by JOSEPH LEIDY, M. D., 271.—Report of the Geological Survey in Kentucky, made during the years 1854 and 1855, by DAVID DALE OWEN, 272.—On a Shower of Ashes over the plains of Quito, by Rev. GEORGE JONES, U. S. N., 276.—Palmotrochis, 278.

Botany and Zoology.—Origin of the Embryo in Plants—Development of the Ovule of Santalum album; with some remarks on the Phenomena of Impregnation in Plants generally, by ARTHUR HENFREY, F.R.S., etc., 278.—Botanical Necrology for 1856, 279.—Gray's First Lessons in Botany and Vegetable Physiology: On the Causes of the opening and closing of Stomates, by HUGO VON MOHL, 280.—On a boring Sponge, by J. LEIDY, 281.—Appendix to a paper on Reptiles in the Collection of the Academy of Natural Sciences of Philadelphia, by E. HALLOWELL, 282.—On some young Gar Pikes from Lake Ontario, by L. AGASSIZ, 284.

Miscellaneous Intelligence.—Observations on the Zodiacal Light, by Rev. GEORGE JONES, U. S. N., 285.—On the Meteor of July, 1856, by THOMAS M. PETERS, 287.—On Dellman's Method of Observing Atmospheric Electricity, by Prof. W. THOMSON, 288.—On the Tides of Nova Scotia, by Prof. CHEVALLIER, 289.—Notice of a visit to the Dead Sea, by H. POOLE, Esq., 290.—Modification of the Barometer, 291.—On the Telescopic Stereoscope, by JAMES ELLIOT: Amos Binney's "Terrestrial Molluska and Shells of the United States": Mastodon, 292.—*Obituary.*—Death of William C. Redfield, 292.—Hugh Miller, 294.—Gregory's Handbook of Chemistry, Inorganic and Organic, 296.—Proceedings of the Geological Society of London, No. 47: Proceedings of the California Academy of Sciences, 299.—List of Works published by the Smithsonian Institution, Washington, D. C., 300.—Notices of New Publications, 304.

NUMBER LXIX.

Page.

ART. XXXI. Remarks on the Huronian and Laurentian Systems of the Canada Geological Survey; by J. D. WHITNEY, - 305

XXXII. Notice of a Photometer and of some experiments therewith upon the comparative power of several artificial means of illumination; by B. SILLIMAN, Jr., and CHAS. H. PORTER, 315

XXXIII. Researches on the Ammonia-cobalt Bases; by WOLCOTT GIBBS and F. A. GENTH.—Part I, - - - - - 319

XXXIV. Earthquakes in California during the year 1856; by Dr. J. B. TRASK, - - - - - - - - - - - 341

XXXV. On the Formation of Craters, and the Nature of the Liquidity of Lavas; by G. POULETT SCROPE, Esq., M.P., F.R.S., F.G.S., - - - - - - - - - - 346

XXXVI. On the Climate of Iowa: embracing the result of Meteorological Records of the year 1856, at Muscatine, Iowa, with a Synopsis of the records of the seven years from 1850 to 1856, inclusive; by T. S. PARVIN, - - - - - 360

XXXVII. Statistics of the Flora of the Northern United States; by ASA GRAY, - - - - - - - - - - 369

XXXVIII. On the Meridian Instruments of the Dudley Observatory; by Dr. B. A. GOULD, - - - - - - - - 404

XXXIX. On two Sulphurets of Copper from the Canton (Ga.) Mine; by N. A. PRATT, Jr., - - - - - - - 409

XL. Contributions to Mineralogy; by Dr. FREDERICK A. GENTH, 415

XLI. On the Separation of Lithia and Magnesia; by J. W. MALLET, Ph.D., - - - - - - - - - - 427

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Electrodynamic measurements, 430.—On Boron, 433.—Notice of a supposed new case of Fluorescence, by Prof. J. W. MALLET, 434.

Geology.—Volcanic Action on Hawaii, by Rev. T. COAN, 435.—Geological Survey of Wisconsin, by I. A. LAPHAM: On the Reactions of the alkaline silicates, by T. STERRY HUNT, 437.

Botany.—Musci Boreali-Americani, sive Specimina Exsiccata Muscorum in Americæ Rebuspublicis Fœderatis detectorum, conjunctiis studiis W. S. SULLIVANT et L. LESQUEREUX, 438.—Fungi Caroliniani Exsiccati, by H. W. RAVENEL: First Lessons in Botany and Vegetable Physiology, by ASA GRAY, 439.

Miscellaneous Scientific Intelligence.—Correspondence of M. Jerome Nicklès—Electric illumination, 440.—New Battery with a constant current, 441.—A Battery, called a battery with triple contact: Nautical Telegraph: Light-houses and Illumination, Lenses and Reflectors, 442.—Manufacture of Soda, 443.—Astronomical News, Paris Observatory: Color of the Moon during eclipses: Works of Arago, 444.—Influence of Temperature on the phenomena of Capillarity: Harmonic proportions of the human body, 445.—Bibliography, 446.—First Comet of 1857, 447.—*Obituary*—Prof. Jacob W. Bailey, 447.—Prof. M. Tuomey, 448.—New Granada; Twenty Months in the Andes, by ISAAC F. HOLTON, 448.—Memoir of John Dalton, and History of the Atomic Theory up to his time, by ROBERT ANGUS SMITH, Ph.D., F.C.S., 449.—Recent Papers by Prof. J. Leidy, M.D.: Notices of new publications, 450.

Index, 453.

ERRATA.

P. 88, line 2 from bottom, for "northeast," *read* "east."—P. 178, lines 3 and 5 from bottom, for "Tannenschein," *read* "Sonnenschein."
